PRODUCT PARAMETER

Model	Working Voltage	Rated power	Noise
AP25BF	24V 	36W	≤61dB

Parts	Input	Output
Adapter	100-240V~ 50/60Hz 1.5A	24V  1.5A

CLEANING AND MAINTENANCE

The fan requires minimal maintenance. Do not try to fix it by yourself. Refer it to qualified service personnel if service is needed.

1. Be sure to unplug from the electrical supply source before cleaning.
2. Plastic parts should be cleaned with mild soap and a damp cloth or sponge. Thoroughly to remove soap film with clean water.
3. Be sure not to make water or other liquid enter inside of motor.

TROUBLESHOOTING

Operation of your appliance can lead to errors and malfunctions. The following tables contain possible causes and notes for resolving an error message or malfunction. It is recommended to read the table below carefully in order to save your time and money that may cost for calling to the service center.

Problem	Cause	Solution
The machine does not work properly after installed	• The power cable is not plugged in or has poor contact.	Make sure the plug is properly inserted into the socket.
	• The switch on the body is not turned on.	Turn on the switch on the body.
The remote does not work	• The battery needs replacing.	Replace the battery.
	• The remote is being used more than 5m away from the fan.	Use the remote closer to the fan and make sure it is pointing directly at the display panel.
