Package Include:

- 1* Hair dryer
- 1* Smooth nozzle
- 1* Instruction manual

Units Parts Name

1. Concentrator
2. Cool shot button
3. Temperature Rocker Switch
4. Speed Rocker Switch
5. Plug & Power cord
6. Cosmetic plate
7. Removable
8. Front housing
9. Rear housing
10. Cord bushing
11. Big diffuser

Technical Parameters

Product name	AC Motor Hair Dryer
watts	2400W
voltage	220-240 V~ 50/60 Hz

Instruction for use:

Dry hair only

1. Connect the power supply and open the switch on the handle.
2. Set the winding gear according to the actual use:
 - I. Gentle warm wind keeps your hair hydrated and prevents it from drying out.
 - II. Strong wind for quick drying.
3. Hold the hair dryer, keep a distance about 5cm from the hair, and move back and forth at a constant speed.
4. Use the cold wind to protect your hair while keeping your hair dry when the hair is about to be dried.
5. Push the switch to "0" and unplug the power cord after use.

Product function and technical parameters

1. Process products, product design simple, meticulous workmanship.
2. Adopt three-layer air inlet filtration, which can effectively prevent foreign matter from entering the air duct and affect the normal use of the product.
3. 1800w power, can effectively and quickly blow-dry hair.
4. Super large amount of negative ions (>2 million/cm³), making hair more pliable and smooth when used.
5. Independent cold air, can make the hair quickly set.
6. Two-speed and two-temperature, one-key switch between normal and nursing files can be achieved.
7. Detachable air inlet cover is convenient to clean dirt and make the product change instantly.
8. Double-layer air tip gives you a warm experience and avoids the risk of hot hand.

How to use

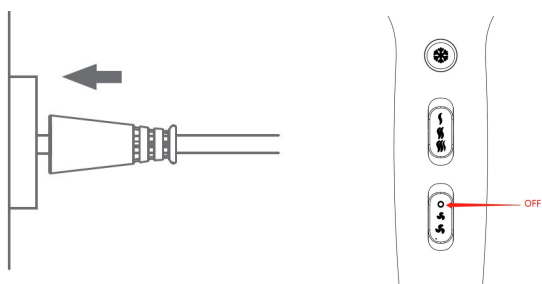

1. This product is only suitable for 220-240V voltage power supply, please do not plug the product into a higher or lower efficiency power supply for use,

220-240V normal use

380V Error voltage

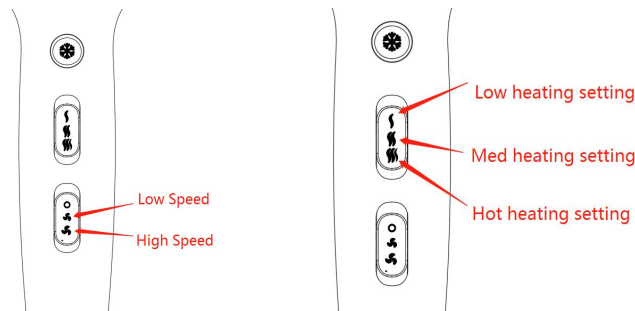

100-150V Error voltage

2. Make sure the power switch is in position " 0 ", then insert the power plug into the power socket, and then push the switch button on the handle to turn it on and off.

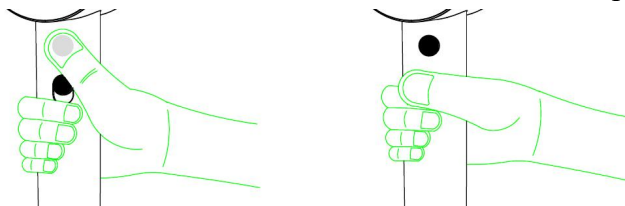

3. Switched the Speed switch to Low speed mode, and switched the speed switch to High speed mode. Switched the heating switch to Low heating setting mode, Switched the heating switch to

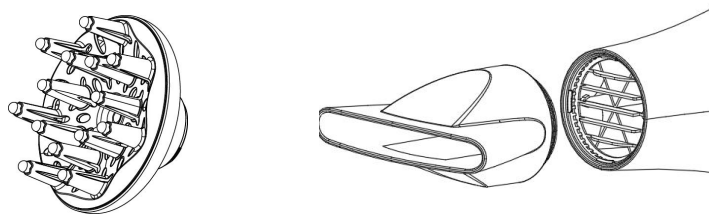

Med heating setting mode, for constant temperature; Switched the heating switch to High heating setting mode, for hot air

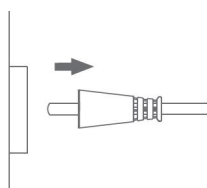

4. When the switch is in gear " I " or " II ", you can press the cold air button to enter the respective cold air mode, and release the button to return the product to the corresponding hot air mode.

5. The product is equipped with a plug gable air nozzle and big diffuser, which can be installed during hair blowing, so as to accurately blow dry hair and shape hair.

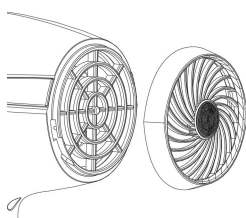

6. After use, you need to push the switch button to position " 0 ", the product is off, and pull out the power plug at the same time.

7. There is a strap on the power cord. You can tie up the long power cord. It is convenient for you to store the product in a safe, dry and clean place for your next use.

8. Please do not discard this part when using! There are three layers of filtration at the inlet and a removable inlet cover. You can remove the inlet cover from time to time to clean up the ash and dirt deposited in the inlet net. In this way, the product will accompany you for a long time to live a healthy and happy life.

Please do not discard
this part when using!
